

Guidelines for Visits

Components of arranging a visit include:

1. Booking an estimated time of arrival, based on the availability provided by the group home.
2. Discussing an estimated duration of visit
3. Who will be coming for the visit
4. Planning how the visit will occur: location, reminder about requested safety measures,
5. Confirm that if the visitor becomes ill, they should postpone their visit

Masking

Visitors are not required to wear a medical mask during their visit. Staff will also ensure that hand sanitizer is available for the visitors' use during each visit.

Expectations

- Visitors who are unwell should delay their visit until their symptoms have resolved x 24 hours
- Hand hygiene should be performed thoroughly and frequently
- Should any of these expectations not be strictly adhered to by the visitor(s), visits will be discontinued for a period of no less than 14 days.

| Activity | Routine Operations | Outbreak |
|---------------------------------|--|--|
| | Safety Measures | |
| Friendly / Non-essential Visits | Permitted, including: <ul style="list-style-type: none"> • Unsupervised • No physical distancing required • Outdoor & Indoor • Rapid tests are available for use • Masks are optional | Suspended |
| Essential Visits | | Permitted Must wear PPE as per outbreak precautions |

If these safety guidelines and expectations are not maintained by the visitor, staff will end the visit and contact their supervisor/on-call supervisor for further direction.
